About Me

Embarking on a career in cybersecurity, I bring with me a self-motivated and target-oriented approach, coupled with the ability to foster teamwork and contribute to winning outcomes. With a keen focus on both physical and mental alertness, I thrive in high-pressure environments, collaborating effectively within teams to achieve common goals. My strong interpersonal and communication skills facilitate seamless interaction within diverse professional settings. I am adept at leveraging initiative and problem-solving abilities, while maintaining a high level of integrity and honesty. With a commitment to continuous learning and active listening, I am poised to excel in the dynamic field of cybersecurity.

Professional Experience

Cybersecurity Analyst Intern **January 2025 – February 2025**

Space block Technology, Lagos, Nigeria.

• Understanding hands-on Security Issues in Cybersecurity

• Implementing password complexity requirements (e.g., length, character types) in authentication systems.

• Enforcing regular password expiration and renewal policies to mitigate the risk of password-based attacks.

• Conducting user awareness training on password hygiene and best practices

• Examination of vulnerabilities in computer systems and networks.

• Performing vulnerability assessments using tools like Nessus.

• Document and communicate security findings and recommendations effectively.

• Exploration of identification and authentication methods, including passwords, and multi-factor authentication, etc.

• Configuring VLANs to logically segment network traffic based on departments, functions, or security requirements.

• Exploration of security challenges specific to computing environments, such as data breaches, misconfigurations, and insider threats

• hands-on capstone project to demonstrate practical knowledge and skills in cybersecurity.

IT Support **October 2023 – March 2024**

Ladoke Akintola University of Technology Ogbomosho, Oyo, Nigeria.

- Collaborated with IT specialists to troubleshoot and resolve technical issues across the ICT department, faculties, and health centers.
- Organized and conducted cyber-awareness weeks to educate students about emerging cyber threats.
- Supervised school examinations, ensuring smooth technological support.
- Collected and managed biometric data of students for seamless authentication in the student portal.
- Communicated effectively with the Chief Information Security Officer (CISO) to identify and address potential system vulnerabilities

IT Assistant **April 2018 – June 2019**

Olak Educational Consultants Modakeke Osun, Nigeria.

- Assisted with exam registrations and NYSC registration processes.
- Provided personalized academic advice to students, ensuring they selected the most suitable courses.
- Maintained excellent communication with customers to resolve inquiries and enhance service quality.

Education

Bachelor of Technology in Cyber Security Science **November 2024**

Ladoke Akintola University of Technology Ogbomosho, Oyo, Nigeria. GPA: 3.58/5.00

Skills

- **Cybersecurity:** Cybersecurity Analysis, Incident Response, Risk Management
- **Analytical Skills:** Problem Solving, Analytical Thinking, Research
- **Communication:** Communication, Team Collaboration
- **Technical Proficiency:** Troubleshooting, Attention to Detail

Area of Interests

Cybersecurity Analyst and consultant| Information Security Analyst | Vulnerability Management | Endpoint Security Analyst | Cybersecurity Awareness Analyst | IT Security Support | Research and Analysis

Research project

Comparative Study of Security Features In AWS, Azure And Google Cloud

Final year project

Certifications

Certified in Cybersecurity (CC). isc2

IBM cybersecurity analyst professional certificate. Coursera
